SUMMARY

Senior engineer searching for a back-end or full-stack role. Only considering NYC hybrid or remote.

EXPERIENCE

Senior Software Engineer

2024 - Present

Airtable - New Product Lines Team

- Building a unreleased initiative.
- Operating in a “startup” within Airtable, working in a greenfield space. Responsible for:
 - Planning and executing large new LLM-powered features.
 - Meeting with alpha customers and incorporating feedback.
 - Bridging the gap between product, design, and our GTM sales org.
- Responsible for standard oncall rotations, interviewing, etc.

Senior Software Engineer

2022 – 2024

Asana - App Scaling Team

- Founded a strategic integrations team. The goal was to accelerate the development of third-party integrations at Asana.
 - Led the end-to-end engineering effort, overseeing a team of four experienced engineers.
 - Served as technical advisor to Strategic Partnerships when evaluating partner companies.
 - Co-created a feature roadmap with CTO of selected vendor. Negotiated the improvements their offering needed to support Asana’s product vision.
 - First year impact:
 - * Asana R&D saved roughly \$2.5 million in engineering cost vs traditional dev methods.
 - * Business Ops estimated an additional \$1.7 million in ARR from unblocked deals.
- I personally wrote Asana integrations for Google Calendar, Gmail, Twilio, Notion, and Pagerduty.

Software Engineer

2019 – 2022

Asana - Notifications Team

- I was responsible for all email notifications, browser notifications, and daily summary notifications generated by the product.

TECH

TypeScript · JavaScript · React.js · Python · AWS · OAuth · iPaaS · Full-Stack · API Integrations

EDUCATION

Stanford University

Palo Alto, CA

Computer Science – 2019
